PROFILE

Motivated and technology-focused Computer Science student specialising in AI Engineering, with hands-on experience in software development, AI, full-stack applications, database systems, IoT and electronics. Continuously developing personal and practical software projects, with additional projects and development work maintained on GitHub. Experienced in building complete applications from frontend and backend development through database integration, API development and cloud deployment. Strong leadership, problem-solving, teamwork and continuous-learning mindset, with a particular interest in Artificial Intelligence, Machine Learning and software engineering.

EDUCATION

University of Birmingham <i>BSc (Hons) Computer Science with AI Engineering</i> – Focusing on Artificial Intelligence, Machine Learning and Software Engineering.	Birmingham, UK Jan. 2026 – Present
AICT Campus <i>Advanced Diploma in Information Technology</i> – Covered networking, programming, systems and database management.	Sri Lanka Jun. 2021 – Dec. 2023
National School Mu/Yogapuram M.V <i>GCE Advanced Level – Biology Stream</i> – Achieved 9th rank at district level and selected for Physiotherapy at the University of Peradeniya.	Sri Lanka Jun. 2019

PROFESSIONAL EXPERIENCE

Director <i>DC Electricals</i> – Directed business operations including planning, procurement, project coordination and team management. – Delivered 1200+ electrical installation projects across Sri Lanka with a strong focus on quality and customer satisfaction. – Developed long-term client relationships and supported business growth through reliable technical services.	Jan. 2020 – Jan. 2026 Sri Lanka – On Site
Chief Electronics Technician <i>Hypers Lab (Pvt) Ltd</i> – Installed, configured and maintained CCTV and electronic security systems for commercial clients. – Diagnosed electronic faults and implemented reliable repair and maintenance solutions. – Worked with security technologies, electrical systems and field-based technical troubleshooting.	May 2021 – Dec. 2025 Sri Lanka
Special Appointment Teacher <i>National School Mu/Yogapuram M.V</i> – Delivered Information Technology and Science lessons to Grade 11 students. – Supported students through practical and technology-focused learning activities.	Jan. 2020 – Apr. 2022 Sri Lanka

SELECTED SOFTWARE & TECHNICAL PROJECTS

Vinayagamoorthy Jothidam – AI Astrology Platform <i>React, Vite, JavaScript, FastAPI, Python, MongoDB</i> 2026 – Present – Developed a full-stack astrology platform combining traditional astrology knowledge with modern web and AI technologies. – Implemented Jathagam calculation, Rasi and Nakshatra details, 22 Porutham marriage matching, Dasa/Bhukti, Panchangam and planetary transit features. – Built a trained AI Agent for astrology guidance, natural-language questions, Jathagam interpretation and context-aware responses. – Developed REST APIs using FastAPI and Python with MongoDB Atlas for scalable cloud-based data management. – Implemented secure authentication, JWT-based access control, input validation and protected API endpoints. – Developed a Progressive Web App and Android TWA version; project is published as an Android application on Google Play Store.	
MR DOC – Business Management System <i>JavaScript, HTML/CSS, Node.js, Express.js, MongoDB</i> 2026 – Developed a complete business management platform for managing purchases, loans, customers, CB and rent, food and salary records. – Implemented invoice generation, transaction history, customer management and administrative user management. – Built analytical dashboards for income, expenses, net profit and transaction monitoring. – Integrated MongoDB Atlas for cloud database storage and designed the system for secure and scalable deployment.	
DC Stock Manager – CCTV Inventory Management System <i>HTML, CSS, JavaScript, Node.js, Express.js, MySQL</i> 2026 – Built a dedicated inventory management system for CCTV and security businesses. – Implemented product management for 150+ CCTV and security products with product images, conditions and stock status. – Developed stock-in/stock-out management, transaction history, low-stock and out-of-stock monitoring. – Implemented professional invoice generation, customer billing, PDF export and automatic financial calculations. – Added role-based user management, protected routes, activity tracking and cloud deployment.	

TVP Hospital Management System <i>Python, Database Programming</i>	2026
– Developed a Python-based hospital management application as a practical software development project. – Implemented structured management of doctors, patients and hospital-related records using database-driven functionality. – Applied Python programming, modular development and database concepts to build a functional management system.	
TVP Employee Management System <i>Python, MySQL, OOP</i>	2026
– Developed a Python and MySQL employee management application with a graphical user interface. – Implemented employee record creation, updating, retrieval and deletion through database integration. – Applied object-oriented programming and relational database concepts in a complete practical project.	
INNOVATE-X – Smart Adaptive Temperature Control System <i>Arduino, IoT, AI, Sensors</i>	University Innovation Exhibition
– Developed as a university team project and prototype for an Innovation Exhibition. – Designed an intelligent temperature-control system using Arduino Uno, temperature sensors and electronic control modules. – Implemented automatic heating, cooling and fan control based on real-time environmental temperature conditions. – Explored Wi-Fi connectivity, real-time monitoring, voice-control concepts, renewable-energy support and IoT integration. – Focused on improving environmental comfort and energy efficiency through intelligent automation.	

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML5, CSS3, SQL, MySQL, C#
AI & Data: Artificial Intelligence, Machine Learning Concepts, AI Agents, Data Processing
Frontend: React, Vite, HTML, CSS, Responsive Web Design
Backend: FastAPI, Python, Node.js, Express.js, REST APIs
Databases: MongoDB, MongoDB Atlas, MySQL
Cloud & Deployment: Cloudflare Workers, Cloud Deployment, Progressive Web Apps, Android TWA
Development Tools: VS Code, Git, GitHub, Postman, MongoDB Compass, Bubblewrap
Other Technical Skills: CCTV & Security Systems, Electronics, Electrical Wiring, IT Services, Graphic Designing, MS Office

CERTIFICATES & COURSES

IBM Design Thinking Practitioner <i>IBM SkillsBuild</i>	Jan. 2026 – Feb. 2026
– Certified in human-centred design thinking, problem solving and innovation.	
Web Development Fundamentals <i>The Programming Hub</i>	Apr. 2026 – May 2026
– HTML5, CSS, JavaScript and Node.js web development fundamentals.	
Programming Certificates <i>The Programming Hub</i>	Jan. 2026 – May 2026
– Completed certificates covering SQL, C#, C Advanced, JavaScript Fundamentals, Python, Python 3, Python Advanced and Artificial Intelligence.	
Web Development Fundamentals <i>The Coding X</i>	Jan. 2026 – Apr. 2026
– Completed training in HTML5, CSS, AI and full website design.	
Python Programming Course <i>The Coding X</i>	May 2026 – Jun. 2026
– Focused on GUI development, MySQL, object-oriented programming and DevOps concepts.	
Gemstone Identification and Valuation Certification <i>Gem Ethics Academy</i>	Aug. 2025 – Sep. 2025
– Professional training in gemstone grading, identification and market valuation.	

ACHIEVEMENTS

• Junior Inventor Award – 2017. • 1st Place – District Level Tamil Speech and Tamil Poetry Competitions – 2015, 2016, 2017, 2018 and 2019. • 4th Place – Provincial Level General Knowledge Quiz – 2016. • 4th Place – Provincial Level Debate Competition – 2019. • Hikvision Co-Brand Recognition through DC Electricals – 2025.	
---	--

ADDITIONAL SKILLS

Professional: Leadership, Communication, Teamwork, Design Thinking, Problem Solving, Project Coordination, Client Relationship Management	
Languages: Tamil (Native), English	
Additional Personal Projects <i>Python, JavaScript, Web Development, AI</i>	Ongoing
<i>Additional personal projects and technical experiments:</i> github.com/tvpriyangan-ai
